Finest Quality Sandstone

Marshalls supplies only the most superior quality imported sandstone for paving and setts. Tested to the most rigorous standards both technically and ethically these imported materials are a completely unique offer which will safeguard the reputation of any specifier.

Not only are these materials produced in accordance with all the UK’s manufacturing and materials standards but Marshalls are so confident in the performance of the materials that they are currently the only UK supplier who will CE mark an imported sandstone paving material.

Manufacturing quality

These materials are manufactured in accordance with ISO9001 Quality Assurance standard and ISO14001 Environmental standards. The factories are also accredited to OHSAS18001 Health and Safety standards making them as good as the best UK manufacturing facilities.

CE Marked

As a guarantee of the consistent high quality of the imported sandstones that Marshalls supply these products are CE marked in line with BSEN 1341 and BSEN 1342.

Durability

Marshalls Sandstones are completely frost resistant and have very low abrasion properties ensuring that they will give longevity to any landscape.

Strength

Marshalls high quality sandstone flags are one of the strongest paving materials available and so could be used in a thinner format than most other paving materials to carry modern urban loadings.

Slip Resistance

Marshalls Sandstone flags are supplied in either a shot blasted finish to enhance their already impressive slip resistance or as a riven slab. Both formats give a good slip resistant paving.

Calibrated Riven Flags

Marshalls is currently unique in offering riven flags in a calibrated format. This calibration gives a flattened bottom face, making them the most consistent and easy to lay riven flags available.

Lead Times

Although small quantities of most paving types are kept on stock, please check the availability of all items with our Natural Stone sales office as lead times may vary.
Edwardian Cream
Light creamy buff in colour
