## 152 Our other products

Marshalls is the UK's leading  
supplier of landscape products  
for the built environment.

## Introduction

We're Marshalls. With you,  
we create better spaces.

Marshalls was established in the 1890s with an enduring set of values. We are committed to doing the right things, for the right reasons, delivered in the right way – ethically and sustainably.

You can find our landscape products in commercial projects and prestigious landmarks throughout the UK, including Trafalgar Square and London's South Bank.

Marshalls Landscape Protection offers a design, engineering and specification approach to street furniture that enables highly effective protective and non-protective solutions to blend seamlessly into urban landscape design.

Our innovations in design, manufacture and technology enable those who design our city spaces to take their visions to the next level.

Right: Igneo seat and stools.

## Materials range

# Stylish, sustainable materials for every project.

We offer a wide range of materials to complement any scheme including our unique Ferrocast®, plus metal, timber and stone finishes, as well as the option to add colour finishing from powder coating and painting.

## FERROCAST®

**Ferrocast®** is created from an extremely durable, corrosion-resistant polyurethane compound which can be cast into any shape, making it extremely versatile.

Ferrocast® Marshalls' unique Ferrocast® is a durable, low maintenance material, which makes it particularly ideal for use in highly trafficked and coastal areas.

### The benefits of adding Ferrocast® products to your scheme include:

#### Corrosion resistant

As a non-ferrous material Ferrocast® is completely resistant to rust and corrosion.

#### Reproductions

Cast iron street furniture which has become degraded can be replicated easily, ensuring the landscape's aesthetics are not affected.

#### Durability

Developed for use in mining, quarrying and North Sea oil industries, Ferrocast® can perform in the toughest of environments.

#### Minimal maintenance

The two-part polymer, heavy-duty coating is proven to last in excess of ten years, even in coastal environments.

#### Polymer pigmented

Polymer is pigmented to closely colour-match the painted finish.

#### Products delivered to site pre-painted

No on-site painting required.

#### Non-freezing

Ferrocast® will not freeze which makes it ideal for coating rails ensuring they aren't cold to the touch.

#### Versatility

Ferrocast® can be shaped into almost any style with a simple moulding process, giving the designer absolute freedom. Fully coordinated ranges of bespoke street furniture can be created.

## Protective products

### Landscape Protection

### Reasons to trust our protective products

#### RhinoGuard® technology

We offer a range of products incorporating Marshalls' own protective RhinoGuard® technology.

#### UK security accreditations

Our products are manufactured and tested to the latest security accreditations in the UK.

#### A wide choice of products

We offer a comprehensive collection of creative solutions.

#### Led by design

A design-led approach to urban security products.

Marshalls Landscape Protection offers design-led Hostile Vehicle Mitigation products enabling highly effective protection to blend seamlessly into urban landscape design. This allows architects, planners and designers to install security measures without instilling fear.

In most cases, crash-tested products are developed with minimal consideration given to the aesthetic, however Marshalls has flipped this on its head by creating solutions that are successfully crash tested and also aesthetically designed.

Our products are manufactured and tested to the latest security accreditations in the UK.

We believe in the importance of creating safe, attractive and inviting environments, and regenerating spaces where people want to spend time, and where they feel safe, not scared.

From planters, seating and cycle stands to litter bins and bollards, the portfolio presents a comprehensive collection of creative HVM solutions.

## Making living and working in urban surroundings safe.

### **RhinoGuard® technology**

RhinoGuard® technology ensures an assured level of protection for those responsible for designing public spaces.

# RhinoGuard®

## PAS68/IWA14-1 bollards

Designed to fulfil aesthetic and security needs, RhinoGuard® bollards have a wide selection of sleeve options, various fixing types and foundation depths available to suit all schemes.

All cores have been tested from 1.5 tonnes to 7.5 tonnes at various speeds up to 50mph.

Sleeves are available with optional grooves and hazard banding tape.

**\* Core security rating:**  
For example 15/30 = 1.5 tonne vehicle @ 30mph

# RhinoGuard® Beam

Incorporating the RhinoGuard® Ultra Shallow 50®, the RhinoGuard® Beam has been crash tested to the IWA 14.1 standard and can successfully stop a 7.2 tonne vehicle travelling at 30mph.

With tailored length options available to suit the scheme's requirements, the protective barrier has the capability of spanning manholes, services, chambers and other obstacles, whilst allowing for expansion and contraction. It can also be used on bridges and other areas where underground service and utilities affect installation.

Weight (kg)	721
Foundations	Type and dimensions dependent on core selection

Proven to stop a 7.5 tonne truck at 30mph, the Redi-Rock™ HVM wall is an effective removable solution that requires minimal maintenance.

Interconnected with steel cables and zero ground anchors, the freestanding blocks are fast to install with no ground work required. Its natural stone appearance ensures Redi-Rock™ blends into the background, protecting surroundings without looking out of place. The solution is therefore ideal for use in crowded places, transport hubs, utility and critical infrastructure as well as buildings of high importance.

SECURITY SPECIFICATION

Only tested with a 7.5 tonne vehicle at 30mph

AVAILABLE ALTERNATIVES

The Redi-Rock™ system is also available as a standard walling system for the retention of earth, landscaping and flood protection applications.

## Planters

Introducing planters can help make a space feel more welcoming while introducing greenery into urban environments. Our HVM planters offer protection that can be placed alongside other protective elements or used standalone to prevent vehicle access. The variety of materials used offer durability and longevity.

## Verso

Modular in nature, Verso can be used to create unlimited configurations or as standalone pieces.

# RhinoGuard®

## Verso

Highly versatile in shape and design, Verso allows for a mix of protective and non-protective elements to be used in unison across a single project.

Comprising of blocks with seating and planter additions, Verso modules can be used to create unlimited configurations or as standalone pieces.

The low height profile means the range is unobtrusive and the concrete colours on offer allow for the range to complement existing surroundings.

*Lifting loops are sold separately.*

# RhinoGuard® Steel Gatekeeper®

Providing temporary protective measures for crowds during Christmas markets or sporting events, the RhinoGuard® Steel GateKeeper® has been successfully crash tested to IWA 14.1, providing protection against vehicles up to 2.5 tonnes travelling up to 30mph.

The tested solution is pedestrian permeable, with vehicle access points and requires no anchorage in any form. This means GateKeeper® can be quickly deployed across all surfaces without relying on kerbs or structural aids.

## MATERIALS

Galvanised steel

Powder coated in any RAL colour

## SECURITY SPECIFICATION

V2500(N1G)/48/90:5.2 - 11 unit crash test  
V2500(N1G)/48/90:11.7 - 5 unit crash test

Optional customisation

Customise GateKeeper® by powder coating or adding a custom branded shroud.

L x W x H (mm)	1265 x 1876 x 1093
Weight (kg)	245

## RhinoGuard® 15/30 range

The RhinoGuard® 15-30 street furniture range has been developed to offer affordable protective street furniture solutions to a wide range of projects.

The range delivers IWA14.1 rated options that can withstand a 1500kg vehicle travelling at 48kph. The stylish, protective pieces negate the need for bulky and obtrusive products, enabling creativity in the design of our public spaces.

The portfolio offers rated versions of the popular Distrikt®, Festival, Geo, M3, Natural Elements and Urbain® seats and benches, and the Natural Elements bin.

## Street furniture

### Stunning schemes brought to life

#### Reasons to trust our street furniture products

##### A wide choice of products

We offer a comprehensive collection of creative solutions.

##### Led by design

Beautifully designed street furniture that complements existing surroundings.

##### Made in Britain

All of Marshalls own brand street furniture is Made in Britain.

##### FSC®-certified material

Some of our street furniture includes wooden elements which are manufactured from FSC®-certified timber.

Marshalls' Street Furniture collection combines inspirational, versatile and practical solutions to enhance the look and feel of public spaces. Our extensive range of landscape furniture includes planters, seating, cycle stands, bollards and litter bins, with numerous designs to complement a variety of different schemes.

We understand the importance of creating safe and comfortable environments that are inviting to members of the public. Our teams in engineering, design and manufacturing work with a reliable network of suppliers to deliver desirable solution-based designs to public spaces, housing developments, event facilities, places of worship and many more.

Our experts are equipped with industry knowledge and know-how to provide a complete service from design through to installation. We pride ourselves on being able to support architects, specifiers and installers get the most out of their schemes.

## Making urban landscapes comfortable, accessible and visually appealing.

# Natural Elements

Personalise your product: bespoke configurations are available with playful modules

## STEP 1 Start with an end panel

Select an end panel, with or without arms.

## STEP 2 Select your core modules

Modules can be configured in any sequence.

## STEP 3 Select an armrest

Choose armrest option between units if required.

- A. END PANEL  
L - 500mm, H - 470mm, W - 75mm
- B. END PANEL WITH ARMREST  
L - 500mm, H - 670mm, W - 75mm

**STEP 4**

Select transition modules  
to change direction

Modules can be configured in any sequence.

**STEP 5**

Finish with end panel

Please see step 1.

**STEP 6**

Ancillary elements

Ancillary elements such as litter bin, bollard or  
cycle stand are also available to maintain the  
design language.

Standalone seat and bench also available.

**UNLIMITED FLEXIBILITY**  
with Natural Elements

Mix and match from the selection of playful  
components to create unlimited configurations.

# Urbain®

Urbain® is a modular seating system designed to fit perfectly into a variety of urban settings.

The customisable seating arrangement includes a breadth of options ranging from armrests, single, double and triple backrest variations and table attachments.

## Litter bins

Whatever the size and scale of your project, Marshalls can help with your waste management solutions.

We can consult with you to provide outdoor litter bins in traditional or contemporary designs to suit any backdrop or location. You will find our street bins in a broad range of materials, styles and colours. Whether plastic, stainless steel or concrete, you're bound to find a street litter bin to complement your space.

Choose the Albion litter bin for function and versatility or opt for the Sineu Graff Contemporary with its sleek looks, ideal for modern spaces.

For extra infrastructure safety, our RhinoGuard® Geo Protective Litter Bin has a PAS 68 core which guarantees a high standard of perimeter protection.

## Perennial planter system

Unlimited design possibilities tailored to your individual requirements.

# Planters

## Perennial planter system

Designed and manufactured in the UK, our modular Perennial planter system provides an excellent way to introduce planting with combined seating into outdoor spaces.

Using a series of connecting panels that can be of varying heights, the customisable planter solution allows for unlimited design capabilities which can be tailored to complement your scheme's individual requirements.

### MATERIALS

#### Timber

FSC®-certified hardwoods

#### Metal

Mild steel

Powder coated in any RAL colour

### MAKE IT PROTECTIVE

Can be customised to incorporate any of our protective **RhinoGuard®** bollards.

 To learn more about our protective offering go to **page 24**

Optional customisation

The Perennial planter system provides flexibility in dimension, colour and material.

### Standard options

- Straight 1m panels
- Four heights: 250mm, 500mm, 750mm and 1000mm
- Three corners: 45°, 90°, 135°
- Height transition panels
- Cantilever Distrikt® seating

### Customisation options

- Length, height, angle, material and finishes

# Tree grilles and guards

## Ferrocast®

Incorporating trees into your scheme can add a welcome touch of greenery to any urban space. To protect the growth of young trees and safeguard existing ones, we offer a range of tree protection products in ferrocast and stainless steel.

Tree guards offer protection from damage in busy environments and tree grilles provide a practical solution for both established and newly planted trees.

# Bollards

## Ferrocast®

Use fixed Ferrocast® bollards to specify perimeters and delineate pedestrian walkways – available in different heights, diameters and designs.

These bollards are made from high-quality polyurethane, which is cast around an internal steel core for increased strength. The non-ferrous exterior protects the bollard against rust and corrosion, which means less maintenance than for cast iron styles.

### MATERIALS

Ferrocast®

Painted in any RAL colour

### FIXING METHODS

All Ferrocast® bollards are available as root fixed with many also available as removable or surface mounted.

### SIGNAGE

Gold highlights and ballotini rings available on selected bollards, on request.

# Street barriers

For effective demarcation of walkways and car parking security, Marshalls' range of steel hoop barriers provides sturdy protection in a number of clean and versatile designs.

Hooped street barriers help to control vehicle access, and are commonly used to act as perimeters around designated car parking areas. The size and shape of hoop barriers also allow for the secured fixing of bicycles and scooters to help prevent theft or damage.

Shown here root fixed in galvanised mild steel with a red powder coated finish.

## Post and Rail

### Strength without fail

### Reasons to trust our Post and Rail products

#### A wide choice of products

We offer a comprehensive collection of creative solutions.

#### Engineered design

A specialist team on-hand to work with you to achieve your vision.

#### Made in Britain

All of Marshalls' own brand street furniture is Made in Britain.

#### Unique material

Includes our durable and corrosion-resistant Ferrocast® solutions.

Our Post and Rail range focuses on barriers that protect property and people. Whether you need to add safety measures at the roadside or warn of dangerous edges in a seafront scheme, a robust Post and Rail system offers a reliable and long-lasting protective measure.

With a variety of contemporary and traditional designs, our Post and Rail systems have been developed to protect perimeters without detracting from the view.

Our designs come in a choice of carefully selected materials including Ferrocast®, stainless steel and mild steel.

Our solutions are available in modular configurations that can be perfectly tailored to your project.

## Designed to safely separate people from edges and roads.

For more inspiration visit:

[marshalls.co.uk/commercial/  
landscape-protection](https://marshalls.co.uk/commercial/landscape-protection)

## Post and Rail Systems

Our post and rail systems sustain specified design loadings while blending with the surrounding environment.

# Achieving your vision

Our specialists can bring your visions to reality, managing the process from conception through to installation.

With our expert team at every stage, including dedicated project managers, experienced production operators with state-of-the-art technology and accredited and qualified installers, you can be confident you are in good hands.

Here are just some of the ways we can ensure the end result for your post and rail brief meets and even exceeds your requirements.

1

## Tender process

Our specialist teams can support you through the tender process. This includes everything from a detailed assessment of the brief and requirements of the space to an outline programme and recommendation package.

2

## Site survey

Site surveys can incorporate both GPS and robotic total stations to gather robust data as well as allowing our in-house team to assess the environment for the installation of products at later stages.

3

## Design development

We transform your ideas into deliverable solutions. Drawings are produced in accordance with British Standards and ROSPA regulations along with supporting material such as samples, 3D models, visuals and renders.

4

### Production

We tailor our manufacturing programme to the needs of the project, ensuring smooth delivery and installation, ultimately saving you time and money.

5

### Project management & installation

We offer a fully-managed cradle to grave installation service overseen by an accredited project manager and conducted by approved Marshalls' installers. This ensures the highest standards every time and complete peace of mind from start to finish.

6

### Project completion

Our support doesn't end after installation. We provide support and guidance on maintenance and effective operation over the lifetime of any product.

## Ferrocaster® systems

Ferrocaster® post and rail systems are a decorative means of restricting access to potentially hazardous areas. They are ideally suited to waterfronts, bridges and near steep inclines as the material will not rust or corrode.

## Reasons to choose our Active Travel products

From segregation solutions, traffic bollards and traffic calming systems to cycle stands and storage, Marshalls Landscape Protection can help to transform towns and cities into safe environments for people to travel safely and enjoy.

Many cycling-related developments, such as cycle lane segregation, junction modifications and road quality improvements bring benefits to the longevity of a scheme. They also create conditions which can promote a reduction in road casualties and air and noise pollution.

Installing infrastructure and products that support these methods of travel will not only have a positive impact on health and wellbeing, but will also reduce emissions. This can be a transformative step towards a more sustainable future for generations to come.

## Helping individuals to travel safely in urban surroundings.

For more inspiration visit:

landscape-protection](https://marshalls.co.uk/commercial/landscape-protection)

## Segregation solutions

### Concrete cycle unit

Our concrete cycle segregation unit is designed to be installed in new or existing schemes as a demarcation tool to safely segregate cyclists from traffic.

Its 45 degree profile provides a soft transition between the carriageway and the cycle lane, allowing cyclists of all abilities to use the cycleway without colliding with a steep kerb or catching a pedal.

The outside kerb offers a bullnose profile designed to stop vehicles mounting the unit and potentially endangering the cyclist.

Segregation solutions  
ZICLA®

ZICLA® works to make cycling safer and city streets more accessible, cyclable and walkable for everyone. ZICLA® does all this by creating products from the waste these cities generate.

ZICLA®'s Zipper® system modules allow the segregation of cycle lanes, building roundabouts, and street corner projections. The Zebra Family® of cycle lane separators enables the segregation of bike lanes. The Vectorial® system allows widening sidewalks to improve urban accessibility in general and accessibility and safety for the public at bus stops in particular.

All these products are reversible and once they have fulfilled their function, they can be dismantled and reinstalled elsewhere to meet specific needs at any given time.

# Bollards

## Contour

The Contour bollard is low maintenance, easy to fit and proves to be a popular choice, particularly on roads where high visibility is key.

Height (mm)	1240
Max. L x W (mm)	350 x 680
Weight (kg)	10
Fixing methods	Surface mounted and fixed with bolts

### MATERIALS

Plastic

Recyclable moulded plastic

### STANDARDS

Conforming to BSEN 12899  
it can be used on any UK road.

# Symbol

Designed to resist tearing and reforms with little or no distortion, even after multiple impacts. The flexible design reduces the likelihood of damage or injury and the need of replacement.

Height (mm)	920
Max. L x W (mm)	350 x 350
Weight (kg)	7.5
Fixing methods	Surface mounted and fixed with bolts

### MATERIALS

Plastic

Recyclable moulded plastic

### STANDARDS

Conforming to BSEN 12899  
it can be used on any UK road.

# Geo hoop sign

A hoop traffic sign with is the ideal solution for locations which clearly need to inform the public of a specific highway instruction.

Height above ground (mm)	1125
Below ground (mm)	450
Sign face dia. (mm)	450
Fixing methods	Sub-surface mounted and fixed with bolts

## MATERIALS

Metal

Stainless steel

# Sentry

Developed to help reduce accidents on rural roads by alerting drivers to hidden junctions, the Sentry bollard is easy to handle and install.

Height above ground (mm)	1125	
Length / Dia. (mm)	1500	166
Weight (kg)	7	
Fixing methods	Root fixed into concrete foundation	

## MATERIALS

Plastic

Rotationally moulded plastic

# Bollards

## Manchester

A traditional style bollard reminiscent of historic the cast iron bollards with options for reflective banding.

Height (mm)	1010
Dia. (mm)	201
Fixing methods	Anti-ram, permanent, bayonet socket, or surface mount

### MATERIALS

Plastic

Rotationally moulded MDPE

Banding recesses are polished.

### BANDING OPTIONS

**5mm banding:** RA1 or RA2 high intensity.

**Metallic banding:** sliver or gold option.

# Night owl

Able to completely collapse on impact, the Night Owl has a highly durable sign face minimising the typical cracking and blistering seen on inferior alternatives.

Product can be single or double sided.

Height (mm)	1037.4
W x D (mm) (top)	395 x 50
Fixing methods	Bolted to a concrete foundation

### MATERIALS

Plastic

Rotationally moulded MDPE

### STANDARDS

Conforms to **BS 8442:2006 (14)** for Retro Reflective Self Righting Bollards, **BS 12767** for Passive Safety of Non Harmful Structures and **BS EN 12899-2:2006 5.6.4** for Torsion Test.

# Sentinel sign 300

With a modern, sleek design the Sentinel bollards are the ideal choice in urban, retail and industrial locations.

Product can be single or double sided.

Other sign options available.

Height (mm)	1419
Dia. (mm)	364
Fixing methods	Permanent, socketed or surface mounted

## MATERIALS

Plastic

Recyclable moulded plastic

# Weebol flex

The robust material, recessed graphics and a flex point designed to minimise panel creasing and return the bollard to near 100% upright position, reduces the likelihood of damage or injury and the need to replace this bollard following an impact.

Height above ground (mm)	1000
Overall length (mm)	1620
Dia. (mm)	400
Fixing methods	Bolted to ground using surface mounting fixing kit supplied

## MATERIALS

Plastic

Rotationally moulded plastic

## STANDARDS

Meets the requirements of BS EN 12767:2004 100:NE4.

# Bollards

## Heritage sign 300 visibol

Our heritage range of bollards come in a number of different styles and offer the perfect solution for local authorities and councils. The bollards can also be personalised to fit in with their surroundings or a certain colour scheme.

Product can be single or double sided.

Other signs available.

Height (mm)	1419
Dia. (mm)	364
Fixing methods	Permanent, socketed or surface mounted

### MATERIALS

Plastic

Recyclable moulded plastic

### BANDING OPTIONS

**Reflective banding:** RA1 or RA2 high intensity.

**Metallic lower banding:** optional.

# Rhino supermarket

The Rhino Supermarket bollard offers excellent strength, visibility and practicality and is perfect for large car parks.

Height (mm)	1000
L x W (mm)	125
Fixing methods	Root fixed into concrete foundation, removable or base plate

### MATERIALS

# Traffic calming

## Speedcheck starter blockramp system

Allowing for ramps to be constructed using block paving, it only requires excavation beneath the ramp areas, keeping disruption to a minimum.

Height (mm)	200 - 220
L x W (mm)	200 x 200
Weight (kg)	193

### MATERIALS

Concrete

### PROFILES

Two profiles are available, allowing for slopes of 1:10 and 1:15 inclination.

# S Ramp

## system

A durable and low maintenance segmental concrete ramp system ideal for traffic calming and speed reduction.

Height (mm)	180 - 255
L x W (mm)	914 x 200
Weight (kg)	79 - 105

### MATERIALS

Concrete

### PROFILES

The profile has excellent ride-over quality for cars, emergency vehicles and buses. Standard pieces can be laid kerb-to-kerb, perfect for pedestrian crossings.

Black & yellow  
rubber speed bump

Offering a superb method of slowing traffic in low speed limit areas such as car parks, residential areas, office complexes and industrial areas.

# Cycle stands and racks

## RhinoGuard® Geo

The Geo cycle stand is an alternative form of protection to bollards. Integrating crash tested protective technology into cycle parking can help to minimise street clutter and maintain the aesthetics of a public space.

Height (mm)	1100
L x W (mm)	1700 x 1132
Dia. (mm)	140 & 204
No of cycles	Up to 2 per stand
Fixing methods	Root fixed

### MATERIALS

Metal

Stainless steel

### SECURITY SPECIFICATION

# Geo hoop

Geo hoop cycle stands provide visual cohesion with the rest of the Geo range. The stand incorporates a tapping bar for the visually impaired and offers a robust level of security and locking positions for all types of cycles.

Height (mm)	850
L x W (mm)	550 x 850
No of cycles	Up to 2 per stand
Fixing methods	Root fixed or surface mounted

### MATERIALS

Metal

Stainless steel

# Multi-hoop

A simple and stylish solution, the R10 multi-hoop cycle rack consists of five Sheffield cycle stands in one unit. Easy to install, it is ideal for locations where there is a high demand for cycle parking: senior schools, colleges, universities and workplaces.

## Our other products

More from Marshalls

## Beyond paving, we offer a range of other solutions.

As a complete external landscaping products business, we cover all manner of outdoor space designs and functions.

Beyond paving, here are the other hard landscaping, infrastructure and water management solutions we supply:

### Natural Stone & Concrete Paving

We are the UK's leading supplier of natural stone and concrete manufactured products for the built environment.

With multiple sizes, textures and colours plus permeable options, we offer an extensive range of hard wearing concrete solutions to suit any landscape.

### Bricks & Masonry

We offer a variety of manufactured concrete products for the construction industry that come in multiple finishes and colours to suit all building and aesthetic requirements.

### Civils & Drainage

We make sustainable infrastructure, water management and retaining wall solutions for a safer and better environment.

### Aggregates

From a network of wholly owned and trusted British quarries, we offer a choice of products from general purpose building sand to aggregates for groundworks.

We offer ranges that are all certified to British Standard requirements or higher.

### Mortars & Screeds

We offer ready-to-use mortar, screed and flow screed delivered from a network of wholly owned manufacturing locations located across the UK.
