# Mortars & Screeds

# Construction is in **our DNA**

Marshalls is the UK's foremost supplier of hard landscaping, building, and roofing products. With a robust history spanning 120 years, you can count on us to support you through your next project and for many more years to come. We are renowned for offering the highest quality mortars and screeds and for setting the benchmark in customer service.

## Closer to you

We have six manufacturing plants strategically situated across the UK, all offering delivery to sites up to 50-mile radius.

Alternatively, you can arrange to collect from your most convenient location. However, it's not only about proximity; our Area Sales Managers provide the support and advice to make your working life easier – and they are backed by our customer service and technical teams, who are always on hand to assist.

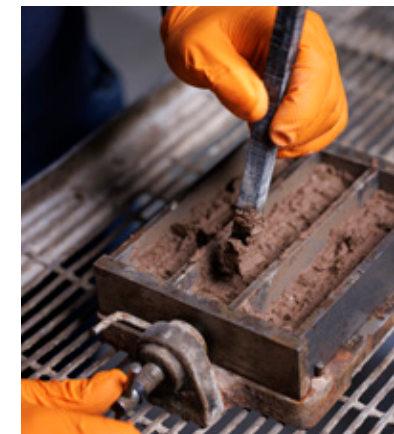

## Seriously responsible

We understand the pressure sustainability brings, and we innovate continually to reduce our environmental impact. All our raw mortars and screeds materials are responsibly sourced within the UK, and all the energy used in manufacture is from renewable sources.

Even our delivery vehicles have Euro 6 engines which produce less harmful air pollutants.

## A whole spectrum of possibilities

Alongside our natural mortar, we offer 31 coloured alternatives to expand the aesthetic opportunities of any project. You can match or contrast your chosen bricks for striking or elegant effects. We offer a free colour-matching service and can supply a sample case that will allow you to physically see your coloured mortar options next to your bricks or other building materials. And your Area Sales Manager can be relied upon for expert advice.

## Screeds

We offer a comprehensive range of screeds to fulfil your requirements. Standard screed is supplied as set-retarded to enable installation and finishing. It also incorporates polypropylene strengthening fibres to prevent cracking and enhance tensile strength and durability. Additionally, we provide Retanol-added screeds for reduced drying times and increased strength, or our Premier screed, which incorporates performative additives that enable it to dry three times faster than conventional mixes.

Our free-flowing liquid screeds can be supplied in a variety of compressive strengths for a flawless finish to domestic, commercial, and industrial projects. We even have variants designed specifically to work with underfloor heating.

## Mortars

Our natural and coloured ready-to-use mortars are available in M4, M6 and M12 strengths and are delivered to your site in one-third cubic metre tubs. They are computer-batched and pan-mixed to fine tolerances, ensuring reliable quality, consistency, and workability. All are delivered set retarded for 36-72 hours to suit your needs. Mixed loads of strengths and colours are available in any delivery.

We can also provide natural and coloured mortar as a dry mason mix. Delivered in bulk bags or loose-tipped, ready for mixing on site.

## Proven quality

We have built a strong reputation for our rigorous quality standards. We test more than 600 samples yearly in our accredited laboratory in Halifax to ensure our products meet the BS EN 998-2 and BS EN 1015-11 standards.

Furthermore, all our production facilities are certified under the ISO 9001 quality management system. The products we sell are highly durable and designed to last the lifetime of any structure when applied in accordance with current Codes of practice.

## MyAccount

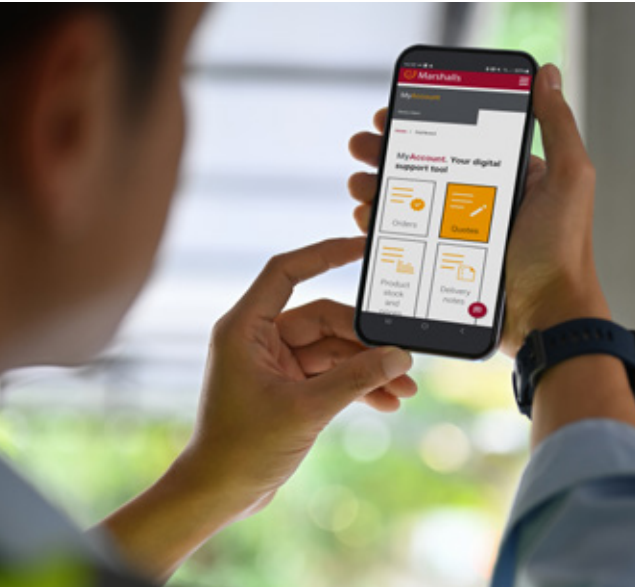

Take advantage of your digital ordering platform. It has been precisely engineered to make your life easier and more efficient – and improve your bottom line.

With no app to download, access and registration are simple and easy. Use any device; all you need is a web browser and an internet connection. You can access different accounts from the same dashboard and securely enable multiple users, making everything quick and easy.

View, create, edit and cancel **orders**, **track current orders and deliveries**, and conveniently access your **delivery note** archive – **24/7. Next day deliveries** are also part of the service.

For Mortars & Screeds customers, there is the additional benefit of a **1% discount** on all mortar orders made through MyAccount. Over a year, this could add £1,000s to your margins.

Additionally, you will continue to receive personal guidance and support from your Area Sales Manager, while also having access to the expertise of our sales and technical teams.
